

PLASTIC LABELS FOR PLANTS

A4 SHEET SIZE FOR LASER PRINTERS
AND HAND WRITING

Index

1. Software
2. Loop-Lock (Tie) labels
3. Tag labels
4. Pointed End (Stick in) labels
5. Labels to staple (Strap)
6. Self-Adhesive labels
7. Larger size Self-Adhesive plastics
8. Plastic for laser printed Placards
9. 100% Biodegradable labels
10. Labels and stakes for Displays, Accesories

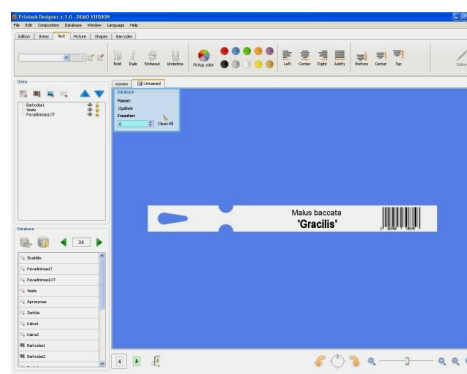

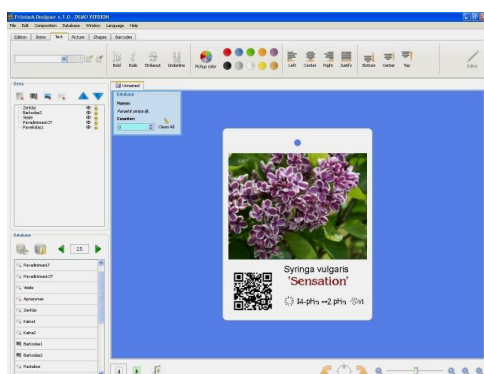

For nurseries, growers and traders of flowers, decorative and forest plants, fruit trees and shrubs, we offer plastic labels in sheets and a program for label design and printing. A small plastic label can give the buyer incredible amount of information that will be valuable for many years while taking care of the plant bought from you. Plant labels have a special power to convince the client to buy the plant at any time of the year. Looking at the nice label buyer can imagine how the plant will look like, how it will bloom. Labels are made for printing with standard monochrome or color laser printers. Printed labels are ready for application immediately after printing. Using our program you can easily and quickly print out the best looking labels for your plants regardless if you are printing only few or hundreds of them. Small nice label with your logo, photo and description of the plant, colored text – is an additional advertising for your company

1. SPECIALIZED SOFTWARE FOR LABEL DESIGN AND PRINTING

PRINTACK Designer is a specialized program for label designing and printing. It allows computer users to design and print out on a laser printer their own customized labels quickly and simply. The program has a multilanguage menu. Label is shown on the screen as it looks like (WYSIWYG). When creating the labels users can insert pictures, descriptions in various languages, maintenance marks, price, barcodes, etc. Program features data import from the databases what allows the users to create their own catalogs of plants. Data can be stored in a Local database or in any external Microsoft Access, Paradox, dBase database or in an Excel or CSV file. Trial software is available free on a request. We offer training, support and maintenance.

Description	Single user license, € excl. VAT
PRINTACK Designer FULL package, for printing on all label formats	430,00
PRINTACK Designer SINGLE FORMAT package, for printing only one type of labels e.g. for loop-lock labels, tag labels, adhesive labels or display labels only	230,00
BKmdb is a program for entering and managing data in a Microsoft Access databases	50,00

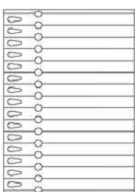

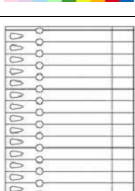

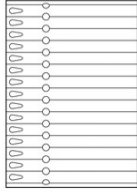

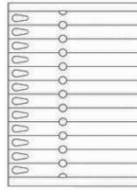

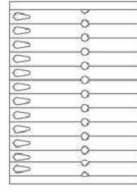

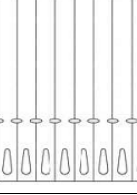

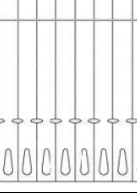

LABEL BLANKS are manufactured from a special heat-resistant types of plastics (also Vellum or Antique paper) and are available in a A4-size sheets. Label blanks are intended for printing on a monochrome or color laser printers. Durable plastic labels are especially suitable for use in rough atmospheric conditions. They are resistant to frost and heat, do not tear from the wind. Information can be printed on both sides of the label. Self-Adhesive plastic labels, depending from the type of material, can be widely used in almost all environments. Monochrome laser printout is particularly resistant to fading. The UV resistance of colored stamps depends on the quality of color toner and the conditions in which the labels are exposed. Labels are sold in 100 sheets packs or separate sheets (commonly used formats only. Ask for assortment and prices). Some of the formats are protected by patents.

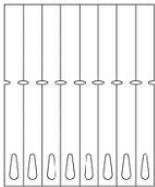

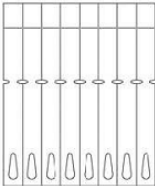

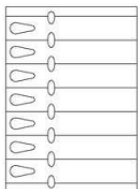

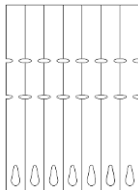

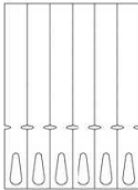

We offer discounts for bigger quantities! Ask for lower prices.

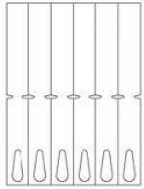

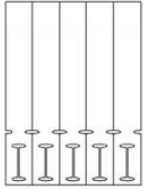

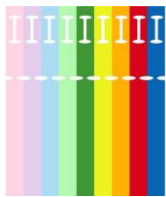

2. LOOP-LOCK LABELS (PEP)

LOOP-LOCK labels can be easily applied without any tools. Suitable for labeling trees, shrubs, roses and other plants with branches. Can be used to label containers, braided furniture, decorative articles and etc.

4. POINTED END LABELS (SEMI). To be stuck in pots or in the earth

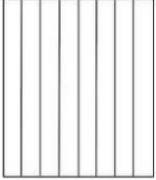

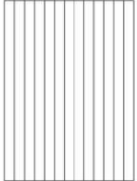

Labels with the pointed ends are manufactured from a semi-rigid plastic to give the best possible rigidity allowing labels to be easily inserted in to the ground, yet the hardness and thickness of the material to allow trouble-free printing on the laser printers. In some soils a blade knife behind the label may be needed to assist insertion. Once inserted, the knife can be removed. The life of this kind of label is generally in excess of 10 years if printed in black and white. Ideal for use in seedbeds, for cacti, perennials, etc.

STRAP-13-TF-c	Colors: rose, pastel violet, pastel blue, pastel green, green, bright yellow, orange, red, blue			135	92,00

6. SELF-ADHESIVE LABELS (STICK)

Self-adhesive labels meet the requirements of many different purposes. They can be made from a different materials to suit each particular environment.

Labels are ordered referring to the Article code from the material table below and the Description code from the label Format table, for example - TF65S/P (P - paper background, F - plastic background)

9. 100% BIODEGRADABLE LABELS

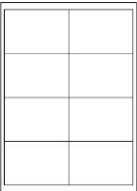

Produced from cellulosic material which is self-decomposing over time. Can be composted. Becoming wet and later dried retains the shape, but it is not windproof when wet. Suitable for indoor marking of plants during the sales season.
